To Our Canadian Customers:

The Canadian MSDSs on our website are the most current versions for our products.

Our Corporate policy requires a product review when changes to our product are initiated. Additionally, there is a semi-annual review for regulatory changes that may impact our product MSDS. The MSDS would be revised and reissued as necessary per these reviews. No changes have been noted since the last issue date of the current MSDS and, therefore, no revision is necessary at this time.

We understand that under Canadian Law MSDSs must be reviewed every three years. Please accept this communication as our verification that we have reviewed the MSDS and it is current as of today's date.

Thank you for purchasing our product. Should you have any further questions regarding MSDSs, please do not hesitate to contact us at (216) 676-2000.

Thank you,

Corporate Health, Safety and  
Environmental Protection Department
